DESIGN INSPIRATION

Flip is a reversible weave featuring custom, space-dyed yarns (yarns dyed to have tonal variations along each strand) in both warp and weft. The smooth, soft surface appears to shiver with movement and visual interest, while double-beam weaving makes it possible for the face and reverse to be entirely different colors. Each side is treated with both soil & stain repellent and anti-pilling finishes, to maximize usability. Multi-purpose weight. 100% Viscose construction. In 8 reversible colors (16 possibilities).
